# Comfort crutches

Quality of life you can feel

# Manufactory

## Hand-made leather covers and paddings for crutches.

### Development

In our manufacturing facility, orthopaedic technicians and upholsterers work together closely with medical professionals. This is where the materials are chosen and new kinds of padding developed.

### Design

In the development of our orthopaedic crutches, we set great store by simple elegance, sometimes with an added dose of luxuriousness.

### Manufacture

Traditional craftsmanship is combined with the use of modern materials and manufacturing technology in the creation of Caredeluxe products.

COMFORT

# Crutches

Our anatomically padded crutch is an exclusive product in every respect that will delight you.

- A pleasant feeling in direct contact with the skin on the forearm and hand, combined with a high level of contact tolerance thanks to the vegetable-tanned leather
- Optimum buffering of mechanical loads in the area of the ulna and the ball of the thumb when walking thanks to the leather cover and anatomical padding
- The colour combinations of the crutches can be individualised to your wishes

Italian Classic

Bright Noblesse

- Hand-made covers from vegetable-tanned leather
- Comfortably padded seat bench
- Individual front bag in leather
- Choice of leathers and colours

# Individual solutions

Choose your own combinations of colours and finishes. There are almost no limited to your personal taste.

# Health

## Skin tolerance

The skin-friendly, vegetable-tanned leather used for Caredeluxe walking aids gives the user a pleasant feeling when walking, and reduces skin abrasion.

## Anatomical padding

The anatomical padding developed by Caredeluxe absorbs the pressure load, protecting the hands and forearms. This can reduce pressure pain and disturbances of the sensitivity.

## Ergonomics

The padding of the handles and forearm shell also benefits other joints and structures, such as the shoulders and cervical spine.
